DETAILED ACTION

Examiner's Notes.

1. The prosecution of this application has been transferred to Examiner Dan Pasiewicz from the docket of Examiner John Morehead. Any inquiry concerning this Office Action or earlier communications should be directed to the current Examiner of record. Current contact information is provided in the last section of this communication.

Response to Arguments

2. Applicant's arguments see pages 9-12, filed 3/27/2008, with respect to the 35 USC 112 rejections of claims 1-2, and 4-5 have been fully considered and are persuasive. The rejection of claims 1-2 and 4-5 has been withdrawn as there is adequate description in Applicant's specification to enable one of ordinary skill in the art to make and/or use the currently claimed invention.

3. **Examiner Notes:** The previous Examiner did not send the proper election of species requirement and thus did not provide Applicant with a complete listing of Species from which to choose. Therefore, Applicant is required to choose a species from the correct list of patentably distinct species. The Examiner would like to assert that if Applicant were to choose the same species (Species I - Fig. 1-4, see below), even though Applicant has amended the elected claims, a Final Office action **WOULD NOT** be issued by the Examiner following Applicant's election as the previous rejection

under 35 USC 112 was improper and no art rejections of the claims were provided in the previous Office Action.

Election/Restrictions

4. This application contains claims directed to the following patentably distinct species

- Species I – page 11 line 10 through page 21 corresponding to Fig. 1-4.
- Species II – page 22 through page 25 line 25 corresponding to Fig. 5-7.
- Species III – page 25 line 26 through page 28 line 18 corresponding to Fig. 8-9.
- Species IV – page 28 line 19 through page 30 line 3 corresponding to Fig. 10.
- Species V – page 30 line 4 through page 31 line 18 corresponding to Fig. 11.
- Species VI – page 31 line 19 through page 33 line 5 corresponding to Fig. 12.
- Species VII – page 33 line 6 through page 34 line 15 corresponding to Fig. 13.
- Species VIII – page 34 line 16 through page 39 corresponding to Fig. 14-15.
- Species IX – page 40 through page 43 corresponding to Fig. 16-19.
- Species X – page 44 through page 45 line 9 corresponding to Fig. 20.

5. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are

added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL M. PASIEWICZ whose telephone number is (571)272-5516. The examiner can normally be reached on M-F 9:00AM to 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lin Ye can be reached on (571)272-7372. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
